✎ Personal profile

As a determined person I believe I possess all the necessary qualities an IT Specialist should have. Having worked in the industry for the last 15 years I gained valuable experience. I am a quick learner, which is backed up by my tenacity and strong desire to succeed. I have also got great organisational skills, able to maintain focus and possess attention to details. Having been a part of a highly dynamic companies has considerably improved my teamwork skills. Willing to take responsibility not only for myself but also for team members in fast paced environment to meet deadlines while maintaining high standards, I proved a well-disciplined individual, who remarkably deals with adversity. Possess healthy attitude to criticism, learn on my mistakes. I always aim to gain new experience and broaden my knowledge and I am open to new challenges no matter how difficult they might seem.

💼 Professional background

FrontEnd developer / SoftServe

Oct. 2023 – Mar. 2024   *Remote*

Duties   – Development of mobile applications

Tools   TypeScript   React Native

I was part of a multinational team that consists of over 500 people in which I contributed to the development of a mobile application for one of the largest financial institutions in Saudi Arabia. Since I was part of the central development squad, I managed to implement several key features of the application. I was also involved in bug fixing, refactoring and code review.

Full-stack developer (part-time) / Processica

Jan. 2023 – Mar. 2024   *Remote*

Duties   – Development of WEB-services
          – Development of BackEnd's API

Tools   TypeScript   React   NextJS   Strapi   PostgreSQL   PHP   WordPress

One of my tasks was to create a FrontEnd client for the real-time chat with an AI bot, and develop an admin panel to manage it. Additionally I developed and supported websites using NextJS and WordPress.

FrontEnd developer (part-time) / Provectus

Oct. 2021 – Nov. 2022   *Remote*

Sep. 2008 – Present   *Odessa, Ukraine*

Duties	– Mainly providing IT support and maintenance to the whole gym network – Software development – Designing and visualization of premises interiors
Tools	Delphi TypeScript React PHP MySQL SQLite AutoCAD 3D Max

I developed a number of software for work with customers. I also developed a bookkeeping software for fitness-cafe and many other different software for specific

tasks. All programs linked with ERP-system for monitoring gyms' work flow in real time, cash flow, payroll and salary transfer, expenses and viewing reports. Of course the website was on me.

IT Developer (part-time) / Sports Federation Of Bodybuilding Of The Odessa Region

Sep. 2010 – May. 2014   *31 Shevchenko Avenue, Odessa, Ukraine*

Duties   – Software development
              – Technical support for various sport competitions

Tools   Delphi   JavaScript   PHP   MySQL   SQLite

I developed a software for managing the competition starting from preliminary participants' registration on website and ending with printing out award letters and issuing full reports. For many years it has been used for competitions at regional level, several times at national Ukrainian level and was presented on a championship in Saint Petersburg.

⊞ Additional employment and experience

As WEB-developer I've made many sites, services, small orders, JS and PHP modules, parsers, etc. There were many React and React Native projects with Redux, Saga, Thunk, MobX, etc. Of Course I have experience with Npm, Git, Figma, Jira, Trello, ClickUp and other useful and popular tools.

Over the years I've worked as a part of the teams and singely, as a full-time employee and a freelancer. There were many difficult interesting tasks that made me learn something new.

Also I've been working with Delphi. I have realeased large projects, many small applications, classes, components and just groundworks. Worked a lot with graphics for UI and pictures` effects. Have experience with WinAPI.

I've had to deal with development for Android and iOS using React Native, Delphi, Java and Objective-C.
